Polishing Wheels and Points Separating Discs for Metals

AB201 Rubber Wheel No1 - Light Grey 7D00001
 Abrasive: silicon carbide, medium-coarse grain. Base: synthetic rubber, soft/flexible. For very fast, scratch-free finishing.

AB202 Rubber Wheel No2 - Grey 7D00003
AB203 Rubber Point No2 - Grey 7D00005
 Abrasive: silicon carbide, fine grain. Base: synthetic rubber, hard. The industry standard for excellent finishing.

AB204 Rubber Wheel - Special Red 7D00007
AB205 Rubber Point - Special Red 7D00009
 Abrasive: silicon carbide, fine grain. Base: synthetic rubber, extra hard. Provides excellent finishing and exceptionally long wear.

AB206 Rubber Wheel — Blue Magic 7D00011
AB207 Rubber Point — Blue Magic 7D00013
 Abrasive: silicon carbide, fine grain. Base: synthetic rubber, soft/flexible. Also excellent for use on gold and other precious metals.

AB208 Rubber Wheel — Knife Edge 7D00015
 Abrasive: silicon carbide, fine grain. Base: synthetic rubber, hard. Same as Item AB202/K, but smaller.

AB221 High-Speed Separating Disc — Red 7D00023
 23.8mm x .63mm 100 pieces per box
 (.938" x .025") Abrasive: aluminium oxide. Special ceramic coating for better cutting of chrome cobalt and other metals. Strong and long wearing.

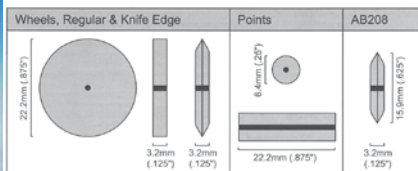

AB309 Slim Disc Separating Disc 7D00029
 22.2mm x .25mm 25 pieces per box
 (.875 x .015") Abrasive: aluminium oxide. Specially formulated for ceramic alloys.

AB223 Separating Disc 7D00027
 Pure silicone carbide abrasive in a specially developed bod provides fast cool cutting of almost any material. Abrasive particles exposed on both sides for clean free end cutting.

AB224 Separating Disc — Safe Side, Grey 7D00057
 22.2mm x .6mm
 Abrasive: silicon carbide for fast cool cutting. Available with abrasive particles exposed on both sides (AB223) or on one side only (AB224)

Deal Price
£5.95

100 pieces per box

Deal Price
£4.95

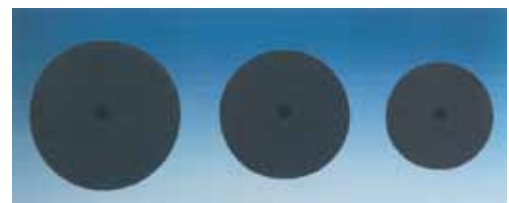

Cut-off Wheels

Abrasive: aluminium oxide

AB210 Cut-off Wheel - Large Thick 7D00017
 38.1mm x 1mm (1.5" x .04")

AB211 Cut-off Wheel - Large Thin 7D00019
 38.1mm x .63mm (1.5" x .025")

AB212 Cut-off Wheel - Small Thick 7D00021
 31.8mm x 1.6mm (1.25" x .063")

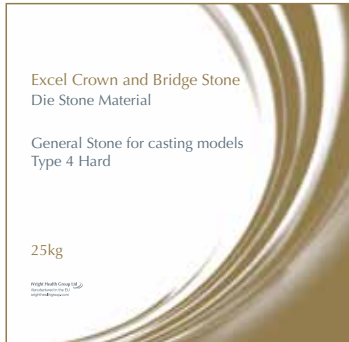

Deal Price
£10.95

Excel Crown and Bridge Stone

Die stone material for casting models.

Type 4 hard.

Yellow 2S03986 25kg

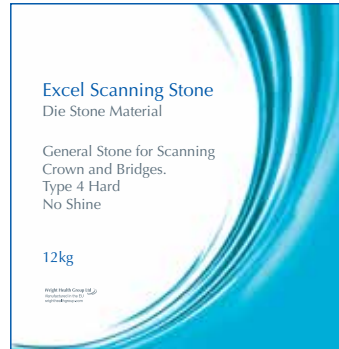

Deal Price

GC Primers Set

- Repairing ceramic with composite
- Adding composite to composite
- Bonding resin acrylic to metal
- Intra oral repairs

GC900457 Set

Deal Price
£115.95

Pattern Resin LS Kit

Low shrinkage modelling resin. The proven modelling resin for making all kinds of custom attachments, fixations, implant abutments or resin dies for electroforming technique.

GC890244 Kit with Timer

Deal Price
£39.95

IPS D'Sign Dentine A-D

The fluorapatite glass-ceramic material is distinguished for its lifelike appearance. Fluorapatite is also a component of natural teeth and supports the light optical properties, such as translucency, brightness and light scattering of the completed restoration.
